

Granted

The AI grants team for small nonprofits

More time for the mission. A clearer path to funding.

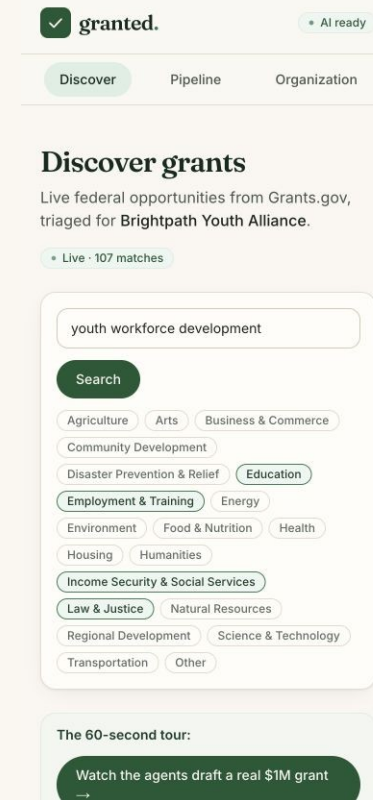

Shivam Gupta
AI Builders Hackathon 2026
grantedai.web.app

Small teams need a clearer funding decision

A nonprofit's program lead may also be its grant researcher and writer.

An unsuitable application consumes time that could support the community. Granted starts by helping the team decide where to focus.

Target users: small nonprofit staff and the consultants who support them.

WHY IT FITS

✓ The opportunity sits in a funding category you selected.

✓ Award size is well matched to your organizational budget.

RISKS & GAPS

! Little overlap between your stated focus areas and the funder's synopsis language.

! Only 9 days to the deadline ; very tight for a federal application.

! Cost sharing / matching funds are required.

ELIGIBILITY

Ineligible

Your organization type isn't in the funder's applicant list, and their own definition of "Others" doesn't mention organizations like yours. Applying would almost certainly be wasted effort.

EFFORT TO APPLY

~60 Hrs · High

Typical federal narrative + budget + registration workload for an opportunity of this size (heuristic estimate).

PLANNING ESTIMATE

Unknown

Not applicable ; the organization isn't eligible to apply.

Fit scores and assumed win odds are decision aids, not funding predictions. Eligibility still requires checking the full notice.

Draft the proposal

Four agents run in sequence: the **Strategist** plans around this funder's priorities, the **Writer** drafts every section from your organization's real outcomes, the **Reviewer** scores it like the funder's panel would, and the **Reviser** rewrites whatever got flagged. You'll watch it happen live ; typically 2-4 minutes.

This opportunity excludes your organization type. Choose an eligible grant to start drafting.

✓ Strategist

Planned 6 sections around the funder's priorities.

✓ Writer

First draft complete.

✓ Reviewer

Panel score: 72/100. This proposal demonstrates solid alignment with the BJA Second Chance Act priorities, emphasizing reentry education and employment for justice-involved youth with credible local partnerships and strong documented outcomes. However, critical data gaps, particularly missing local statistics in the statement of need and unclear projected participant numbers in the budget section, weaken the application's competitiveness. Additionally, the lack of previous federal grant experience and limited detail on managing federal compliance are concerns that should be addressed to improve capacity demonstration.

✓ Reviser

Revision complete. Updated panel score: 84/100.

STRATEGIST'S READ ON THIS FUNDER

This funder prioritizes improving educational and employment outcomes for justice-involved youth leaving incarceration, with a strong focus on reducing recidivism through vocational training, credential attainment, and job placement. The proposal will emphasize Brightpath Youth Alliance's proven track record in delivering paid workforce training resulting in industry-recognized credentials, effective partnerships with juvenile and probation offices, and significant recidivism reductions. The narrative will showcase programs that build marketable skills aligned with local labor market demands and include mentorship to enhance long-term job retention, while addressing capacity expansion to serve more youth effectively.

Project Description

Edit section

1 review note

Brightpath Youth Alliance proposes to expand and enhance the Second Shift reentry program, delivering comprehensive education and employment services tailored for justice-involved youth in central Ohio.

The project integrates paid workforce training, vocational credentialing, job placement, and sustained mentorship to build lasting career pathways.

The expanded Second Shift program will offer a 12-week paid training curriculum in construction trades and logistics, culminating in OSHA-10 certification, an industry-recognized credential that enhances employability.

This aligns directly with BJA priorities to develop marketable skills in trades experiencing labor demand.
